Quality Management System Certificate

ER-0505/2021

AENOR certifies that the organization

BRIGH SUD AUTOMOTIVE

has a quality management system according to the ISO 9001:2015 Standard

for the activities: **Manufacture and marketing of automotive spare parts**

which is/are carried out in: **LOT 698 ZONE INDUSTRIELLE SAPINO. 27000 - NOUACEUR (Morocco)**

First issued on: 2021-10-07

Validity date: 2024-10-07

Rafael GARCÍA MEIRO
Chief Executive Officer

THE INTERNATIONAL CERTIFICATION NETWORK

CERTIFICATE

AENOR has issued an IQNet recognized certificate that the organization:

BRIGH SUD AUTOMOTIVE

**LOT 698 ZONE INDUSTRIELLE SAPINO.
27000 - NOUACEUR
Morocco**

has implemented and maintains a

Quality Management System

for the following scope:

Manufacture and marketing of automotive spare parts

which fulfills the requirements of the following standard

ISO 9001:2015

First issued on: **2021-10-07** Validity date: **2024-10-07**

This attestation is directly linked to the IQNet Partner's original certificate and shall not be used as a stand-alone document

Registration Number: ES-0505/2021

Alex Stoichitoiu
President of IQNet

Rafael GARCÍA MEIRO
Chief Executive Officer

Confirmation of the successfully completed initial assessment

Dear Sir or Madam,

The initial assessment of your company

BRIGH SUD S.A.R.L.
20240 NOUASSEUR CASABLANCA

has been finished with a positive result.

I am glad to tell you that the verification of your quality insurance system according to the products - named in the document 'application details' – compared to Krafftahrt-Bundesamt is fulfilled.

In case no type approval is granted within 1 year after the initial assessment was finished successfully, the initial assessment has to be repeated.

If applications for approval of products of a different kind are submitted it will be necessary to expand the existing initial assessment.

We hope for a good cooperation. If you have questions, do not hesitate to contact us.

With best regards

(Nina Sonnabend)

BRAKE PADS WORKSHOP TOTAL QUALITY CONTROL

QUALITY CONTROL LABORATORY

- OUR LABORATORY IS EQUIPPED WITH MACHINES DEDICATED TO PRODUCE THE FOLLOWING TEST:
 - . FRICTION TEST
 - . SHEAR TEST
 - . COMPRESSIBILITY TEST

PRODUCTS

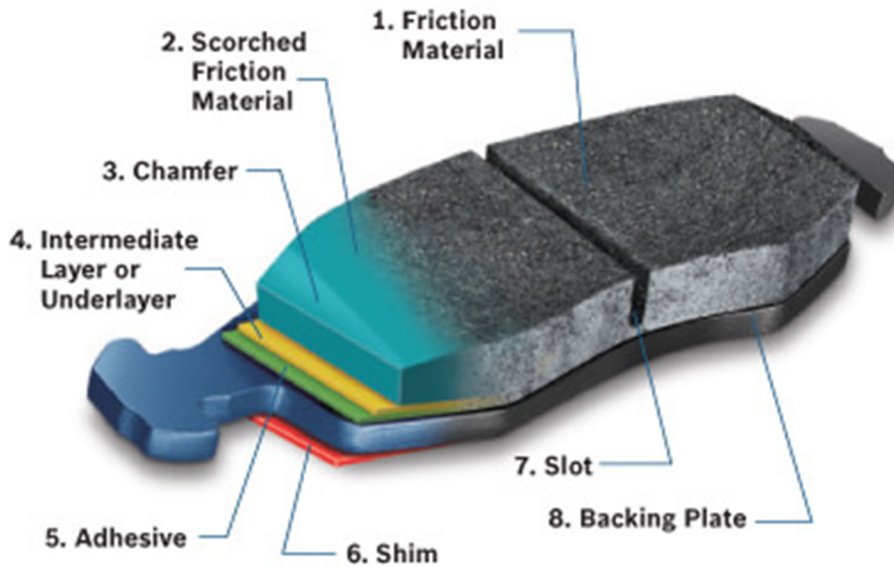

PC & CV BRAKE PADS
SEMI-METALIC , METALIC , NAO & CERAMIC
FORMULAS

HAWK

1. Friction Material

Friction material formulations to ensure the material is a suitable match for the performance requirements of each vehicle application.

2. Scorched Friction Material

Speeds up the bedding in process by 'scorching' the pads to burn off gases and excess resins instead of allowing them to be burnt off on the vehicle during the bedding in process.

3. Chamfer

Used where required, this reduces noise during the 'bedding-in' process.

4. Intermediate Layer

This layer of friction material has a higher resin content. This increases the bond strength with the back plate and reduces heat transfer to the brake fluid, which can reduce braking performance.

5. Adhesive

This bonds the friction material to the backing plate.

6. Shim

Used where required, this damping material absorbs vibration and minimises noise.

7. Slot

Used where required, this allows the pad to flex under pressure and prevents the friction material from cracking.

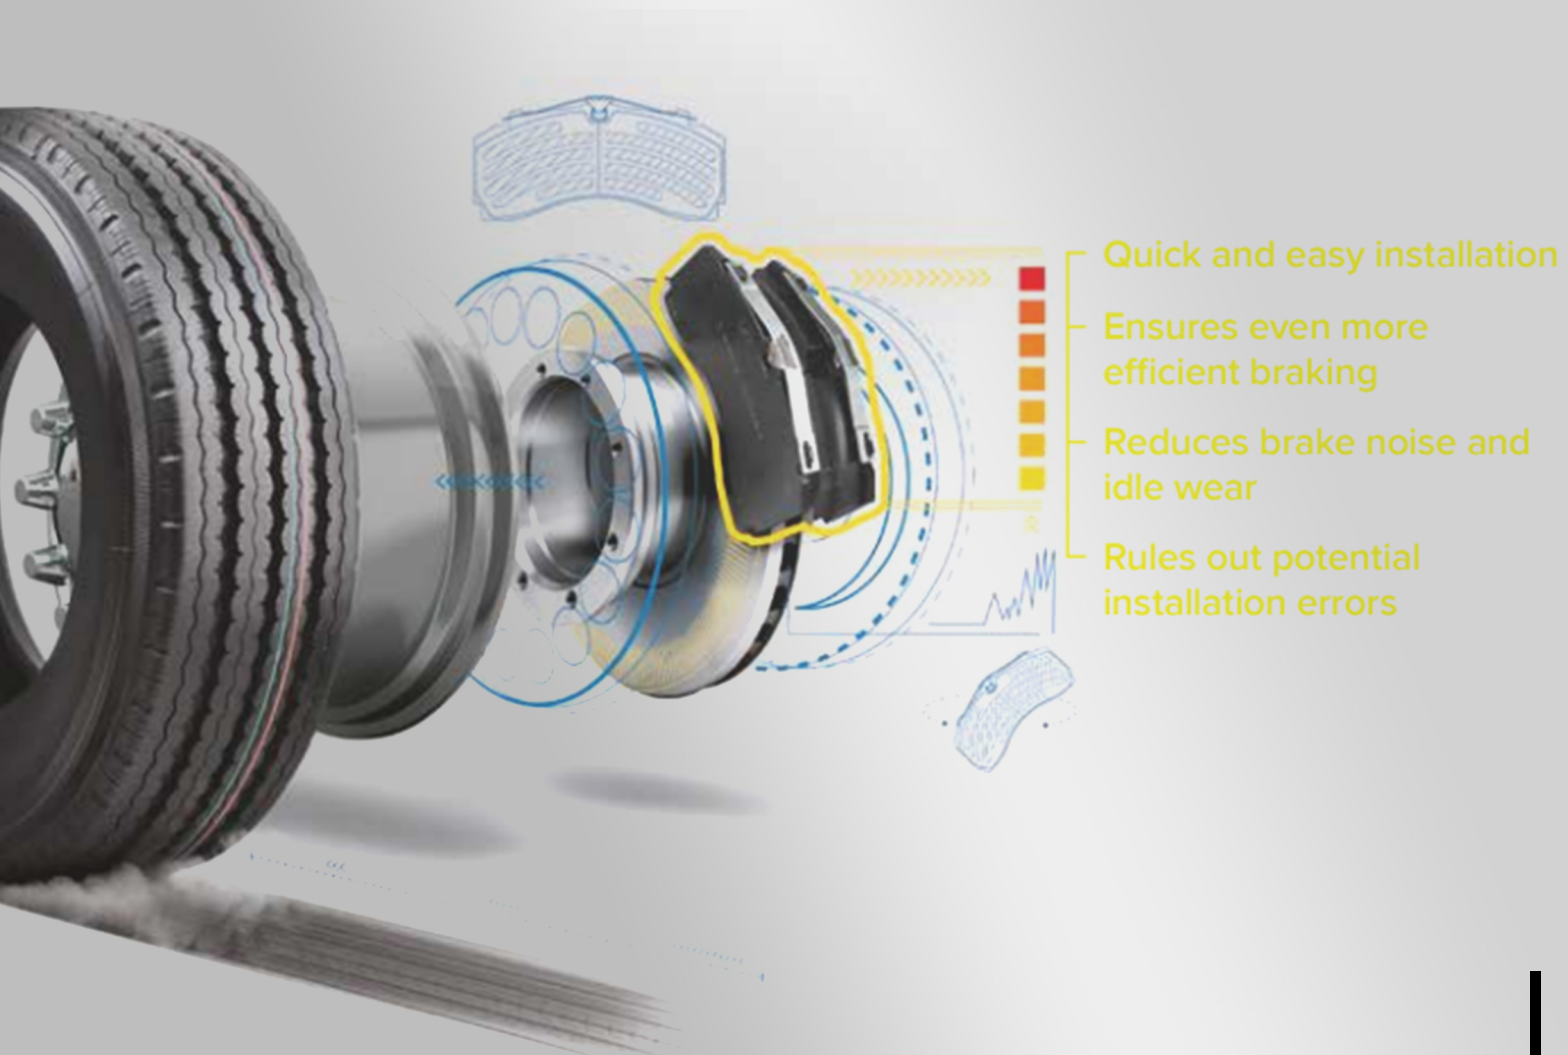

8. Backing Plate

The backbone of every brake pad. Our backing plates are powder coated to prevent corrosion.

For a quick and safe brake pad replacement

The safety of cv drives and their cargo is our top priority.that's why BRIGH SUD decidedly innovative pad retaining system to ensure a permanent welded connection between the spring and our brake pad's back plate. it's a small change,but it makes a world of difference
